NOOSA PROPERTY

DOWLING & NEYLAN
SINCE 1976
REAL ESTATE

Welcome to our Autumn edition of 'inside Noosa Property'

Summer proved to be a testing time for the local real estate market. A true 'wet season' combined with press reports of devastating floods and cyclones saw Noosa's visitation levels 50% lower than normal during the holiday period. Subsequently, all retailers were adversely affected and there was less property sales enquiry.

Many of the property transactions that did take place were described as 'absolute bargains' mainly due to the fact that the selling price was well under the listing price –however, in many cases these listing prices were actually too optimistic (funny how the media choose to ignore this in reports).

Noosa has experienced similar conditions before; during both the early 1980's and 90's where the market fell by up to 30%. In both cases the market then recovered fully and posted significant gains in the following years. This means that 2011 could be a year of tremendous opportunity.

Our internal research indicates that we're at the bottom of the property cycle now and the growth cycle will return! Buyers are now commenting again that they believe Noosa represents value. Remember, the fundamentals of Noosa have not changed and if anything the unique qualities of this area are reinforced as each day goes by.

We hope that you enjoy our latest collection of quality properties available for sale in this truly special part of the world.

Kind regards,

Dan Neylan
